Introduction

*Africa's first **AI social media** team.*

A coordinated team of AI agents that plans, creates, publishes, engages, and analyzes, helping businesses grow while founders focus on building.

Pre-Seed Round • 2026

The Problem

Building a brand on social media shouldn't require building a team.

Founders either spend hours creating content themselves or pay thousands for managers and agencies. Both approaches are costly, time-consuming, and rarely deliver predictable growth.

"We're investing in social media, but we can't confidently measure the return."

We heard the same problem in more than 55 conversations with startup founders.

Problem Statement – Broken Down

3 Cost every business faces

01**High talent costs**

Building an in-house social media team or retaining an agency requires significant ongoing investment.

02**Time-intensive execution**

Content strategy, creation, publishing, community management, and performance analysis remain largely manual.

03**Uncertain ROI**

Despite the investment, many businesses struggle to achieve consistent growth or clearly attribute business results to social media.

The result: Companies spend more, move slower, and still struggle to turn social media into a predictable growth engine.

Why Now?

- *AI now automates work that once required an entire social media team — **82%** of marketers already use AI tools for it, but most existing platforms aren't built for African languages or pricing.*
- *Social media is the #1 customer acquisition channel for **83% of marketers**, yet most African SMBs are locked out by tools priced and localized for Western markets.*
- *Africa's internet economy is set to grow **52% by 2029 to 1.1B** users and already contributes **\$240B to GDP** — but AI software built for its languages and workflows remains scarce.*

The Solutions ↘

Introducing - Quevora

The Solutions ↘

Instead of hiring an entire team, Quevora gives you a coordinated team of specialized AI agents, each responsible for a critical part of your social media growth.

Built for the way businesses work

WhatsApp-native workflow: Review, approve, or publish content with a single tap from WhatsApp.

Local-first AI: Understands regional context and communicates naturally in English, Pidgin, French, and other local languages.

One subscription. One AI team. Every stage of your social media workflow, working together to help you grow.

Lara

Head of Social Media

Leads your strategy, coordinates the team, and serves as your primary point of contact.

Kai

Content Creator

Creates high-performing content, from hooks and captions to visuals and creative assets.

Maya

Content Strategist

Researches your industry, audience, competitors, and trends to build a winning content strategy.

Kent

Community Manager

Engages with your audience by managing comments, messages, and conversations naturally.

Dara

Data Analyst

Monitors performance, uncovers insights, and recommends what to improve for faster growth.

A massive market at the intersection of AI, social media, and Africa's digital economy. As millions of businesses invest in social media to acquire customers, they're increasingly looking for software that replaces manual work, not just helps manage it.

TAM

Total Addressable Market

: \$33 Billion

Global Social Media Management Software Market, driven by growing demand for AI-powered marketing and business automation.

SAM

Serviceable Addressable Market

: \$2.6+ Billion

Our serviceable slice: Sub-Saharan Africa's share of that global market, based on an estimated 44 million formal SMEs across the region and rising digital-tool adoption.

SOM

Serviceable Obtainable Market

: \$5.4M ARR
(3-year target)

Our realistic, bottom-up target: 5,000 paying businesses across Africa — 60% on our Starter tier (\$49/month) and 40% on Agency plans (est. \$150/month for multi-brand management) — blending to approximately \$447,000 in monthly recurring revenue, or \$5.4M ARR.

Size of Market

Business Model

Quevora is a subscription-based SaaS platform that replaces the cost and complexity of building a social media team with a single AI-powered solution

- Recurring subscription revenue with monthly and annual plans.
- High gross margins driven by software, not service delivery.
- Multi-brand expansion increases revenue as customers grow.
- Minimal incremental cost to serve additional customers, enabling efficient scaling without proportional headcount growth.

Subscription-Based SaaS

Tiered monthly plans based on user limits and features.

Usage-Based Billing

Clients pay based on activity volume or API calls.

Enterprise & Agency Plans

Tailored pricing for large clients with dedicated support.

Revenue Model

Pricing:

Features:

Additional Services:

FREE PLAN

\$0/ month

- Scheduling and publishing for individuals getting started
- Limited features
- Basic support
- No customization

No additional services included

STARTER PLAN

\$49/ month

- One brand with a complete AI social media team.
- More features
- Standard support
- Some customization

Optional add-ons available for purchase

GROWTH PLAN

\$89/ month

- Two brands, advanced AI capabilities, collaboration, and deeper insights.
- Full features
- Priority support
- Full customization

Premium support and consulting included

AGENCY PLAN

Custom Pricing

- Built for multi-brand organizations and agencies managing multiple clients.

Early Validation

300+ Businesses

on our waitlist before product launch, validating strong early demand for an AI-powered social media team.

55+ Founders

consistently revealed the same pain points around cost, complexity, and unpredictability of managing social media.

Strong founder and ecosystem interest

with startup founders, operators, and ecosystem leaders expressing interest in becoming early customers, partners, and investor introductions.

Strategic partnerships

in progress to accelerate distribution and customer acquisition ahead of launch

OTHERS

01. Others help teams manage social media

02. Buffer, Hootsuite are social media management platforms built for manual workflows.

QUEVORA

Quevora gives businesses an AI social media

Quevora gives a coordinated team of AI agents that researches, strategizes, creates, publishes, manages communities, monitors brand reputation, and continuously optimizes performance.

WHY QUEVORA WINS

AI Team, not AI Features — Specialized AI agents work together like a real social media team instead of isolated AI tools.

WhatsApp-Native Workflow — Review, approve, and manage your entire workflow from the app businesses already use every day.

Built for Africa — Local languages, regional context, local currency billing, and workflows designed for African businesses.

End-to-End Execution — From strategy and content creation to community management, reputation monitoring, and analytics in one platform.

The Result: While competitors help people do social media better, Quevora is built to do the work for them.

01

Founder & Chief
Executive Officer

Jah'swill Ojo-Obasuyi

Founder of **JAYY Media** and
The SMM Club.

02

Co-Founder & Chief
Technology Officer

Godgift Egims

Former Co-Founder
& CTO of **Kros AI**

03

Co-Founder & Chief
Design Officer

Divine Bello-Ososo

Former Co-Founder
& Head of Product
Design at **Pendeet**

04

founding Member &
Chief Creative Officer

Festus O. Iyenahie

Founder, **TechXentre**,
Team Lead, **Eden**.

Meet The Team

YEAR 1

- Reach 1,000+ businesses using Quevora.
- Convert 500+ businesses into paying customers.
- Grow to ~\$45K in Monthly Recurring Revenue (MRR).
- Validate product-market fit.

YEAR 2

- Expand to 10,000+ businesses across Africa.
- Grow to 2,000+ paying customers.
- Reach ~\$179K in Monthly Recurring Revenue (MRR).
- Scale through strategic partnerships and distribution.

YEAR 3

- Serve 50,000+ businesses across Africa and beyond.
- Grow to 5,000+ paying customers.
- Surpass \$447K in Monthly Recurring Revenue (MRR) — ~\$5.4M ARR.
- Establish Quevora as the leading AI social media platform for African businesses.

Growth RoadMap

Use of Funds ↗

Raising \$300,000 in Pre-Seed Funding

We're raising \$300,000 to launch Quevora, validate product-market fit, and build the foundation for a category-defining AI company.

What This Round Delivers

- Launch a fully functional AI social media team.
- Convert our waitlist into active, paying customers.
- Validate product-market fit through measurable customer adoption and retention.
- Build a repeatable go-to-market engine ready to scale.
- Generate the traction needed to raise our next institutional round.

We're not raising to experiment. We're raising to execute.

45 %

Product Development & AI-Engineering

Build our AI agent architecture, platform infrastructure, integrations, and core product experience.

20 %

Team Expansion

Hire key engineering, product, and growth talent while maintaining a lean, execution-focused team.

15 %

Go-To Market & Partnerships

Customer acquisition, strategic partnerships, community growth, and early sales.

10 %

Operations & Legal

Compliance, security, infrastructure, and company operations.

10 %

Working Capital & Runway

Extend runway and maintain operational flexibility.

Thank You
